PROJECTS

Hotel Reservation System

July 2025

Team Project - 4 members | Role: Full-Stack Developer (Back-End Focus)

- Helped design and implement a user-friendly JavaFX interface for searching room types, reserving, canceling, and modifying bookings.
- Managed SQLite database schema design and integration to ensure reliable storage and retrieval of guest, room, and reservation data.
- Led development of core back-end functionalities in Java, including reservation creation, modification, and cancellation using object-oriented design principles.
- Integrated front-end and back-end components to enable real-time data updates and deliver a seamless user experience, including confirmation notifications and managerial reports.

WORK EXPERIENCE

Summer Intern, Sechaat, Inc.

June 2024 - Aug. 2024

- Collaborated on the design and development of a website powered entirely by AI technologies.
- Oversee the creation, management, and evaluation of AI-generated product descriptions, reviews, and other online content, ensuring accuracy and alignment with current technology trends.
- Conduct extensive online research on artificial intelligence, consumer tech products, and technology trends to inform website content and strategies.
- Develop expertise in AI concepts, SEO practices, and AIO (Artificial Intelligence Optimization) for website enhancement, while gaining hands-on experience with ChatGPT prompt engineering, Google Analytics, and affiliate marketing strategies.
- Support the team with link-building initiatives, thorough online research, and effective content management tasks.
